

Join iSPEX-EU and measure air pollution with your smartphone

You can play a vital part in helping scientists to better understand the impact that air pollution has on the environment and our health. With the iSPEX add-on and app, you can transform your smartphone into a scientific tool to measure tiny particles in the atmosphere that contribute to air pollution and its impacts in an as-yet poorly understood way. iSPEX-EU aims to form a network of thousands of people all over Europe that perform iSPEX measurements and provide information at locations and times that are not covered by current air pollution monitoring efforts – and we need your help! By joining iSPEX-EU you can be part of a major project to help understand our atmosphere and make an important scientific contribution!

iSPEX-EU campaign:

- 1 September – 15 October 2015
- More than 10 major cities in Europe
- Free iSPEX add-on and app
- Supported phones: iPhone 4, 4S, 5, 5S

Visit www.ispex-eu.org to find out more and to join.
